PROFILE

Although I didn't graduated in faculty that are related to this position, also I don't have any experience as a programmer or developer. but I'm a very ambitious in this industry, so it leads me to be interested in working in this position. After that, I start to learn via websites and Youtube. I practice making a mini project. Of course, I will still be developing in any project. I believe logical thinking, analytical skills and good responsibility are my qualifications. I hope to work with you and do my best for the most benefit to your company.
