Yala City, Thailand

## PROFILE

---

I'm a very ambitious in software engineer looking for a role in an established IT company with the opportunity to work with the latest technologies on challenging and diverse projects. Although I didn't graduated in faculty that are related to this position, also I don't have any experience as a programmer or developer, but I like technology. so it leads me to be interested in working in this position. After that, I start to learn via websites and Youtube. I practice making a mini project. Of course, I will still be developing in any project. I believe logical thinking, analytical skills and good responsibility are my qualifications. I hope to work with you and do my best for the most benefit to your company.
